

Fiberglass Exterior Door Checklist

This checklist is meant as a first step to guide you through the selections you will need to make to order a fiberglass exterior door. This is a general list and not inclusive of every option available with entry units. Please refer to our exterior door page for links to manufacturer's websites and when you are ready, give us a call and we'll help you finalize your selections!

- Door Style** – what is the model number of the door you've chosen?
- Door Configuration** – is it a single or double door? Do you have side lites? 1 or 2? Do you have a transom over the door?
- Door Handing** - is the door inswing or outswing, left or right?
- Door size** – height and width of door
- Side lite style** – if you have side lites, what is the model number of the style you've chosen?
- Side lite size** – height and width of the side lite(s)?
- Glass** – what type of glass would you like (i.e.: low E, regular, decorative)?
- Glass Grille** – what type of grille would you like on the glass? (i.e.: fixed, removable, SDL, etc.)
- Hinges** – what type and finish of hinge would you like?
- Sill** – what type and finish of sill do you want?
- Jamb** – what type and size of jamb do you need?
- Weatherstrip** – what color weatherstripping do you need?
- Exterior Casing** – what, if any, casing would you like the door manufacturer to provide?
- Storm Door Adaptor** – do you need a storm door adaptor for the door?
- Door Finish** - do you want the door prefinished by the manufacturer? One side or two?
- Hardware prep** – how should the door be prepped for your hardware? (i.e.: single or double bore? Backset? Mortise? Multipoint?)
